"LIEUT. Ep. MORTINER."-We have some further facts in relation to this individual, who put up at one of our olty hotels on Sunday. ETACUATION OF COLUMBUS -The Gibraltar of the West-the greater than Manaesse, according to rebel authority-has fallen without the firing of a eingle gun, and for that very reason is the greatest victory of this entire campaign. That a point so strong, naturally, as Columbus was, with the uninterrupted labor of hundreds of men for nearly six months in fortifying, and so armed that 20,000 men could successfully resist 100,000, should be evaquated without the discharge of a slugle gun, its guns dismounted, and many of them carried away, is a compliment to the plans of the Western campaign which cannot be too highly estimated. SHOCKING AND PATAL ACCIDENT .- Mrs. Rebecca Whitman, relict of the late Dr. S. Whitman, was shockingly and fatally burned in New Albany night before last. While standing before the fire, her clothing was caught by the fiames, and, being alone and too unwell to give an alarm, she was so burned before assistance reached her that she died yesterday morning, after suffering intense agony. Mrs. W. was one of the pioneers of New Albany, having settled there more than forty years ago. She died at the ripe age of 62, highly esteemed by all who knew her. Her funeral will take place this morning at 10 o'clock from Mr. Sissloff's residence, on Lower Second street beween Market and Spring.

In Parliament Mr. McGuire called the attention of the House to the serious dis olution appropriating \$80,000 for removing tress at present existing in Ireland. Sir Robert Peel, in reply, refuted his assertious aud in the course of his remarks, said that no more remarkable proof of the absence of grievances existed than that which occurred the other day, when there was danger of a rupture with America. Ireland was discontinuance of the pensions to the ohil. full of American emmissaries, trying to raise up a spirit of disloyalty.

Serving Machine! Warranted the Best in the Market. ELIAS HOW JR., & S. H. ROPER'S COMBINED PATENTS. treight-Inne Movements, Original Transverse Shuttle, and Periphery Clamp Feed-Wheel.

Takes trecent improvements, are nearly notscless when in operation, run with the greatest case and rapidity, and are better adapted for general purposes and family use than any other. They are not liable to get out of order, are exceedingly shipple, and are made expressly for real practical utility; they do every variety of sewing, from the finest woven tissue to the heaviest woolen goods, both tailoring and fine leather work. Any person may learn to operate them in a very short time. The great difficulty with all other old-style Machines is too much complication, requiring 80 much constant adjustment, and such an amount of mechanical skill and ingenuity to use them to advantage, as to render them of little comparative value.

But the Sewing Machines mannfactured by Greenman & True are not lishle to these objections, as any man & True are not lishle to those objections, as any person, on even a moment's examination, will readily discover. They will do more and better work than any other Machine ever offered to the public, making the most heautiful lock-stitch, alike on both sides. Send for an off-hand specimen of sawing upon any material you wish, and you will then see how it is done.
